Dhyana Yoga Presents

Joan Hyman

Emergent Handstands & Hand Balances

Whether you love to be on your hands and upside-down or whether inversions bring up all your issues, Joan Hyman, an openhearted teacher with over 20 years experience, will support you in this workshop as you emerge from your current perspective and literally rise up! Class will include a thoughtful warm-up flow and move into a guided practice of Uttanasana (standing) with transitions, all of the Tithakana (deadly) variations you may not have ever heard of yet, and of course Handstands! As time allows, we'll move into more Second Series postures such as Pashasana (mouse), Bhakasana (frog), Pincha Mayurasana and specifically Mayurasana itself (peacock) and more! Practicing these postures with insights from a teacher like Joan is truly a blessing, and can transform your yoga practice in the most empowering ways. All are welcome! Emerge...and Evolve!

Saturday, June 25 12:30-3pm

Tick-Tock! It's Bandha Time...

Join one of Dhyana Yoga's favorite visiting teachers! Philadel- Joan Hyman, for a challenging practice to open your heart! Joan often speaks about the importance of practicing with love and devotion, and as she supports you in class you can feel these cornerstones deep in your soul. Come and learn from information on how to make your inversions bright and your backbends rich by finally, fully, activating your body locks or bandhas when practicing everything from handstand to deep back to tick-tock! Class will finish with pranayama and meditation. Don't delay! It's time to pour your heart into your practice -- sign up today!

Sunday, June 26th 12:30-3pm

Yoga Teacher Training

200 & 300 Hour Yoga Teacher Training Weekend & Accelerated Weekday Programs

The Area's Longest Running Yoga Teacher Training Focused On Self-Realization Through Intelligent Physical Practice Of Yoga In The Ashtanga Vinyasa Tradition.

Diana D'Amato-Vitarelli, John Vitarelli, Bruno Circolo and additional guest educators!

Course Content:

- Applicable Anatomy for asana (the postures) and pranayama (the breathing techniques)
- Asana Cycles (naming postures in great detail)
- Chakras and their Relationship to Practice
- Meditation and Mudras Techniques
- Pranayama, or the breathing practices of Yoga
- Bandhas (the body locks) and how to harness them in Practice
- Philosophy (Yoga Sutra, Bhagavad Gita, and other Vedic studies)
- Sanskrit (how to pronounce important terms, poses, mantras, and practice writing letters)
- Hands on Assists and Adjustment Modules
- How to Teach Beginners & Special Populations effectively
- How to design your OWN sequences properly and safely
- Variations, modifications, and contraindications of poses and transitions
- Expert teaching tips, business advice and how to lead workshops, retreats, and privates. How to get hired and/or run a Yoga Business
- How to teach Pre-Natal Yoga
- Ayurveda (wealth, diet, lifestyle choices) and Self Care Practices

Testimonials:

"Dhyana Yoga's 200-hour teacher training program not only prepared me to be a knowledgeable, confident yoga instructor it helped me discover a new outlook on life." ~ J., 2015 Graduate

"I am so inspired by the program you have created, it has truly given me the steps I've been looking for to forge a new path for myself!" ~ T. 2013 Graduate

"You realize the solid training you have received in Teacher Training when you are hired to teach an intermediate vinyasa flow class and then are asked to teach a more restorative practice right before start time! Thank you for giving me the knowledge to get through this successfully!" ~ M. 2013 Graduate

"I feel more empowered as a teacher being in this training. I feel the subject matter is unparalleled to any other advanced trainings and surpasses them all! Golden."

18 To 40 GHz Solid State Field Generation

Field Strengths Up To 50 V/m

Tired of using traditional low Mean Time Between Failures (MTBF), long delivery and short warranty Traveling Wave Tube Amplifiers (TWTAs) to generate these field strengths at frequencies from 18 to 40 GHz?

AR now offers a high-frequency amplifier/antenna solution in one package. These new systems provide better harmonic performance, increased reliability, quick delivery, a 3-year warranty and are only a fraction of the cost of TWTAs solutions.

AA systems are available to cover the 18 - 26.5 GHz or 26.5 - 40 GHz frequency bands with two different minimum field strength offerings in each band. A separate rack mounted unit which includes cabling, DC power, RF routing, and control circuitry is also available. For a complete turnkey field generation system, a separate signal generator can also be included.

Ideal applications include EMC Radiated Susceptibility for MIL-STD-461 Testing, Radar Systems, Communications and TWT Replacements.

To learn more, visit www.arworld.us/AAseries or call us at 215-723-8181

AR Equipment Available For Rent

rf/microwave instrumentation

We're with you all the way

Your Tests. Your Terms.

Budgets are getting smaller, but you still need the right test equipment to get the job done. AR has introduced a new rental plan - with great low rates and an incredible make it easy to get the AR equipment you need.

Ask your local AR Sales Associate for Details www.arworld.us/sales

The 3-Month, 10%, 95% Buyout Credit Plan

If you're serious about eventually buying the equipment, this is a great way to acquire it now while "saving" toward the purchase. The minimum rental is three months and the rate remains constant at 10% of list price for the length of the rental. If you choose to buy, 90% of the rental fee paid is credited toward the purchase (up to 95% of list price). You may rent the equipment as long as you need or execute a buyout at any time. Return the equipment after the three-month rental minimum with no penalties.

Month	Rental Payment Without Tax	Buyout Credit % of Price	Buyout Price Without Tax
1	10%	9%	91%
2	10%	18%	82%
3	10%	27%	73%
4	10%	36%	64%
5	10%	45%	55%
6	10%	54%	46%
7	10%	63%	37%
8	10%	72%	28%
9	10%	81%	19%
10	10%	90%	10%
11	10%	95%	5%
12	10%	0%	5%

The 1-Month, 20%, 50% Credit Plan

This plan enables you to rent equipment for as little as one month! First month's rental is 20% of list price. The rental declines each month until it reaches 2% of list price in month 22 and remains there for the length of the rental. If you choose to buy, 50% of the rental fees paid are applied to the purchase (minimum buyout is 5% of list price).

Month	Rental Payment Without Tax	Buyout Credit	Buyout Price Without Tax
1	20.00%	10.00%	90.00%
2	18.00%	9.00%	81.00%
3	16.20%	8.10%	72.90%
4	14.58%	7.29%	65.61%
5	13.12%	6.56%	59.05%
6	11.81%	5.90%	53.18%
7	10.63%	5.31%	47.87%
8	9.57%	4.78%	43.19%
9	8.61%	4.31%	39.19%
10	7.75%	3.91%	35.28%
11	7.00%	3.50%	31.78%
12	6.36%	3.18%	28.62%
13	5.82%	2.91%	25.69%
14	5.30%	2.65%	23.05%
15	4.81%	2.41%	20.69%
16	4.35%	2.18%	18.57%
17	3.92%	1.96%	16.68%
18	3.52%	1.76%	14.92%
19	3.15%	1.57%	13.35%
20	2.81%	1.39%	11.91%
21	2.50%	1.23%	10.57%
22	2.22%	1.09%	9.31%
23	2.00%	1.00%	8.55%

- All rentals are implemented through AR RF/Microwave Instrumentation.
- Buyout option can be exercised anytime during the rental. Buyout must be executed before the rental month ends.
- Customer can return the equipment at the end of the minimum rental period of the option chosen.
- Not all AR equipment is available for rent.
- Program may be changed or cancelled at anytime.
- First month's payment must be received before rental equipment will be shipped.
- Customers may continue to rent indefinitely.
- Equipment listed in the "Bargain Corner" section of the AR RF/Microwave Instrumentation website is available for rent.
- The AR Option Plan is currently only available to North American customers.
- AR's equipment rental program may be considered a capital lease or an operating lease program, please consult your accounting professional for appropriate treatment.

Adaptable, Constantly Changing!

Control Freq.

The TGAR System Makes Automotive Conducted Immunity Testing Simple

The innovative, user-friendly TGAR System is so flexible it can handle most existing specs – and adding most of the new specs. Purchase an AR Worldwide TGAR System, and more than likely you'll find the features you want are finally here! Base current rating of 83 amps, covers over 90% of DU requirements of ISO 7637-2 (2004), SAE J1113-11, JASO and SAE J1455 International Autom meets the requirements of Ford, DaimlerChrysler and General Motors and can accommodate many Honda, BMW, Mercedes Benz and more. And it's easy to install software updates – just download. With a built-in oscilloscope for easy pulse verification and self-calibration, the test data is convenient test report. And, Lab-View based software and built-in arbitrary waveform generators allow users to use the TGAR System even includes a built-in auxiliary power supply.

The TGAR System is backed by the best comprehensive warranty in the business.

For more information, visit www.ar-worldwide.com or call 215-723-8181.

Let Go with Brainlink™.

When you invest in top-of-the-line, high-power amplifiers and test products from AR, it makes sense to go the extra mile and buy a system that connects and coordinates them—with more precision than human beings are capable of.

Called Brainlink™, AR now offers products that fully integrate the components (your equipment and/or ours) of any test – amplifiers, antennas, couplers or signal generators, for example, into one smooth-running system. You're not caught plugging and unplugging equipment between tests, a hassle always larger than you anticipate. The Brainlink brain does it all, from one centralized, computerized locale.

AR Worldwide supplies a multitude of unique RF solutions to some of the finest names worldwide. From leading automotive and communications giants to the military, AR Worldwide is there. Our limitless support network reaches the far corners of the world and everything we sell is backed by our exclusive, "second-to-none, best-in-the business" warranty.

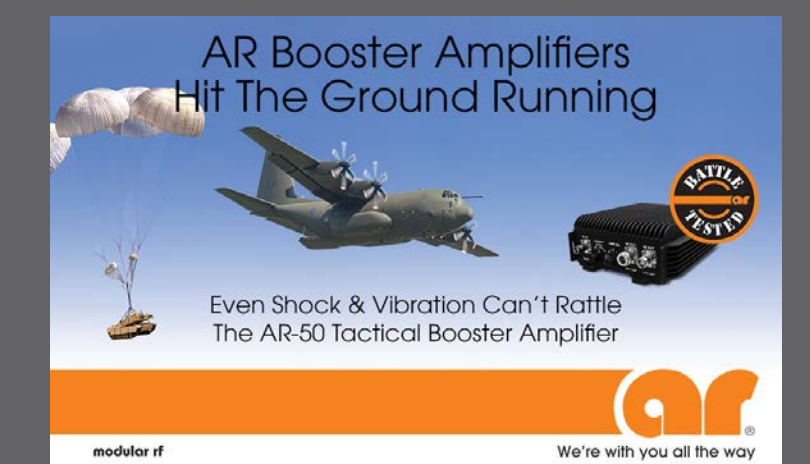

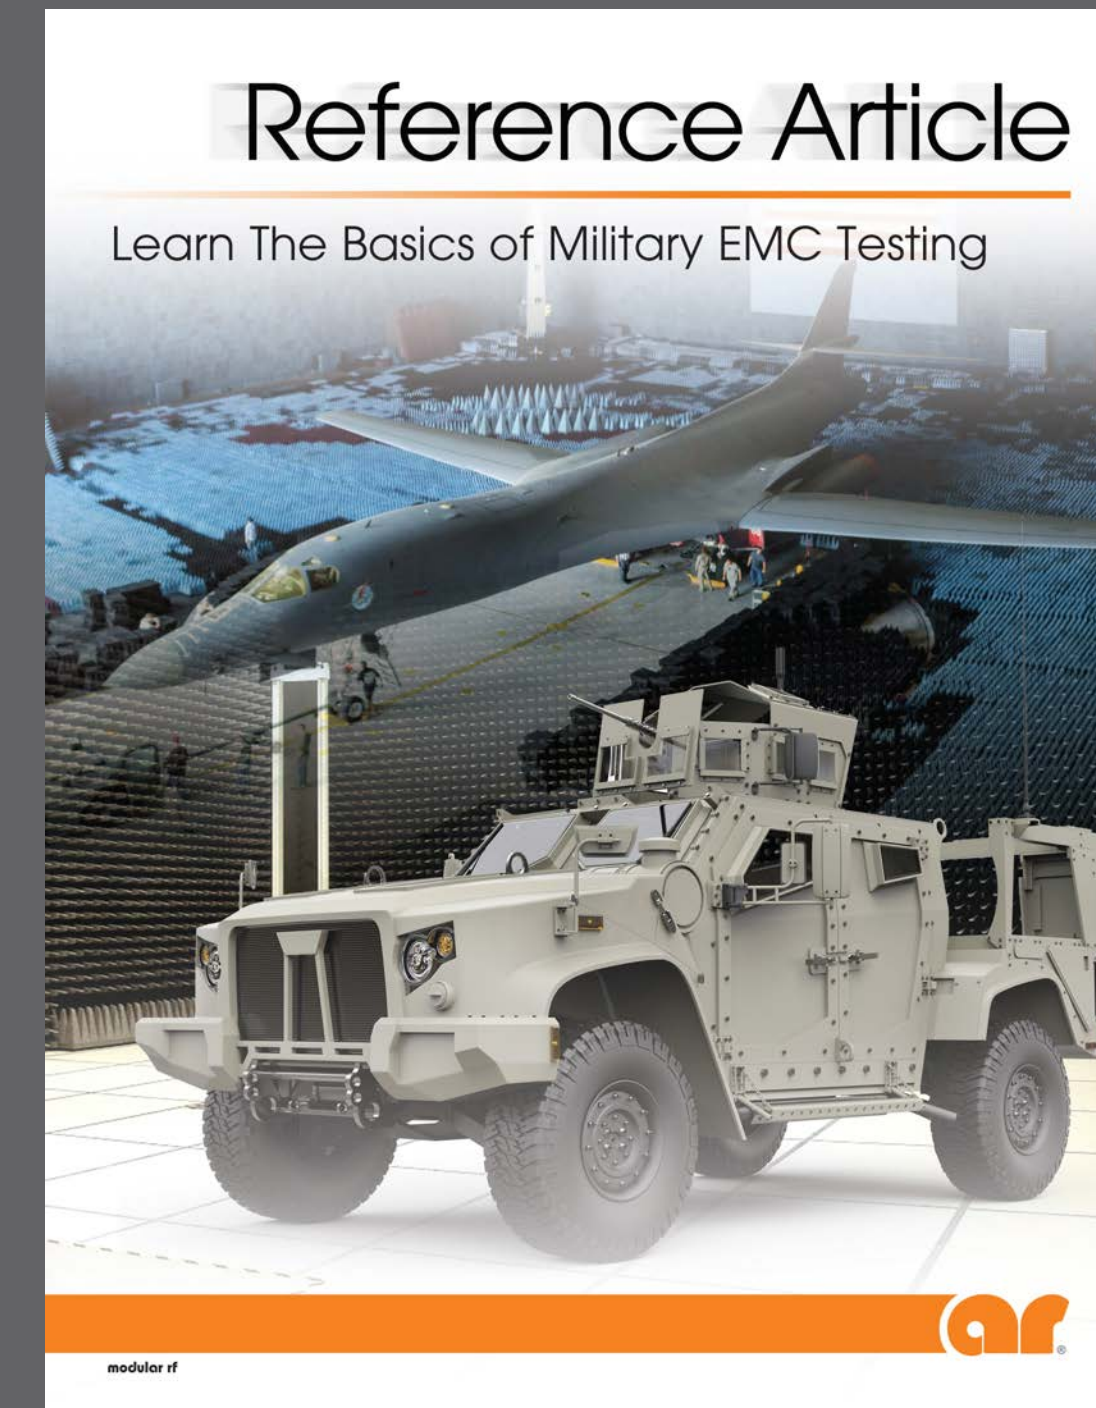

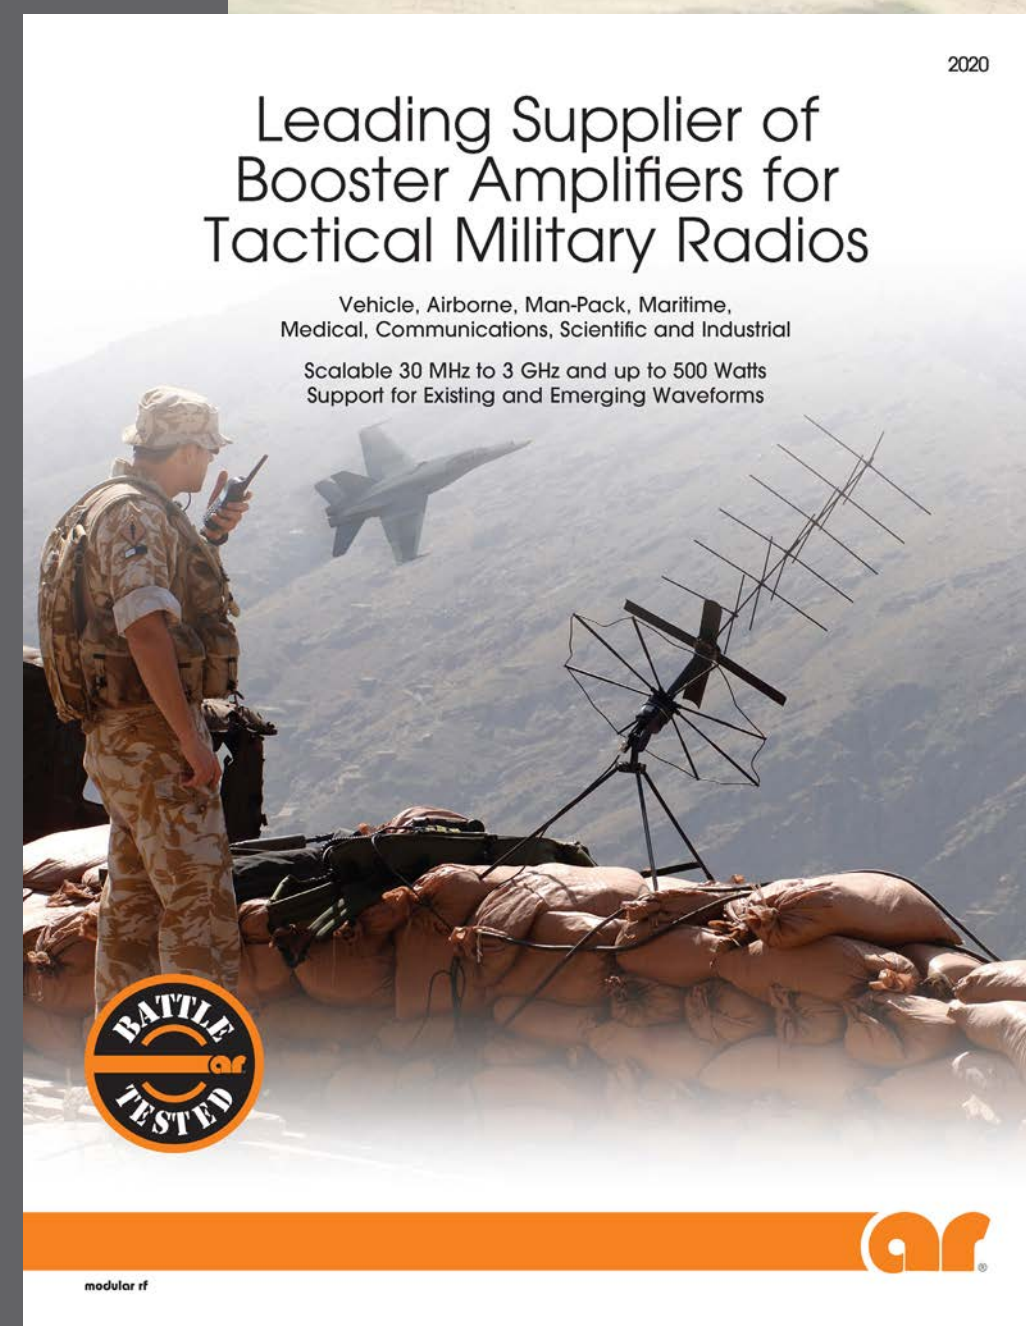

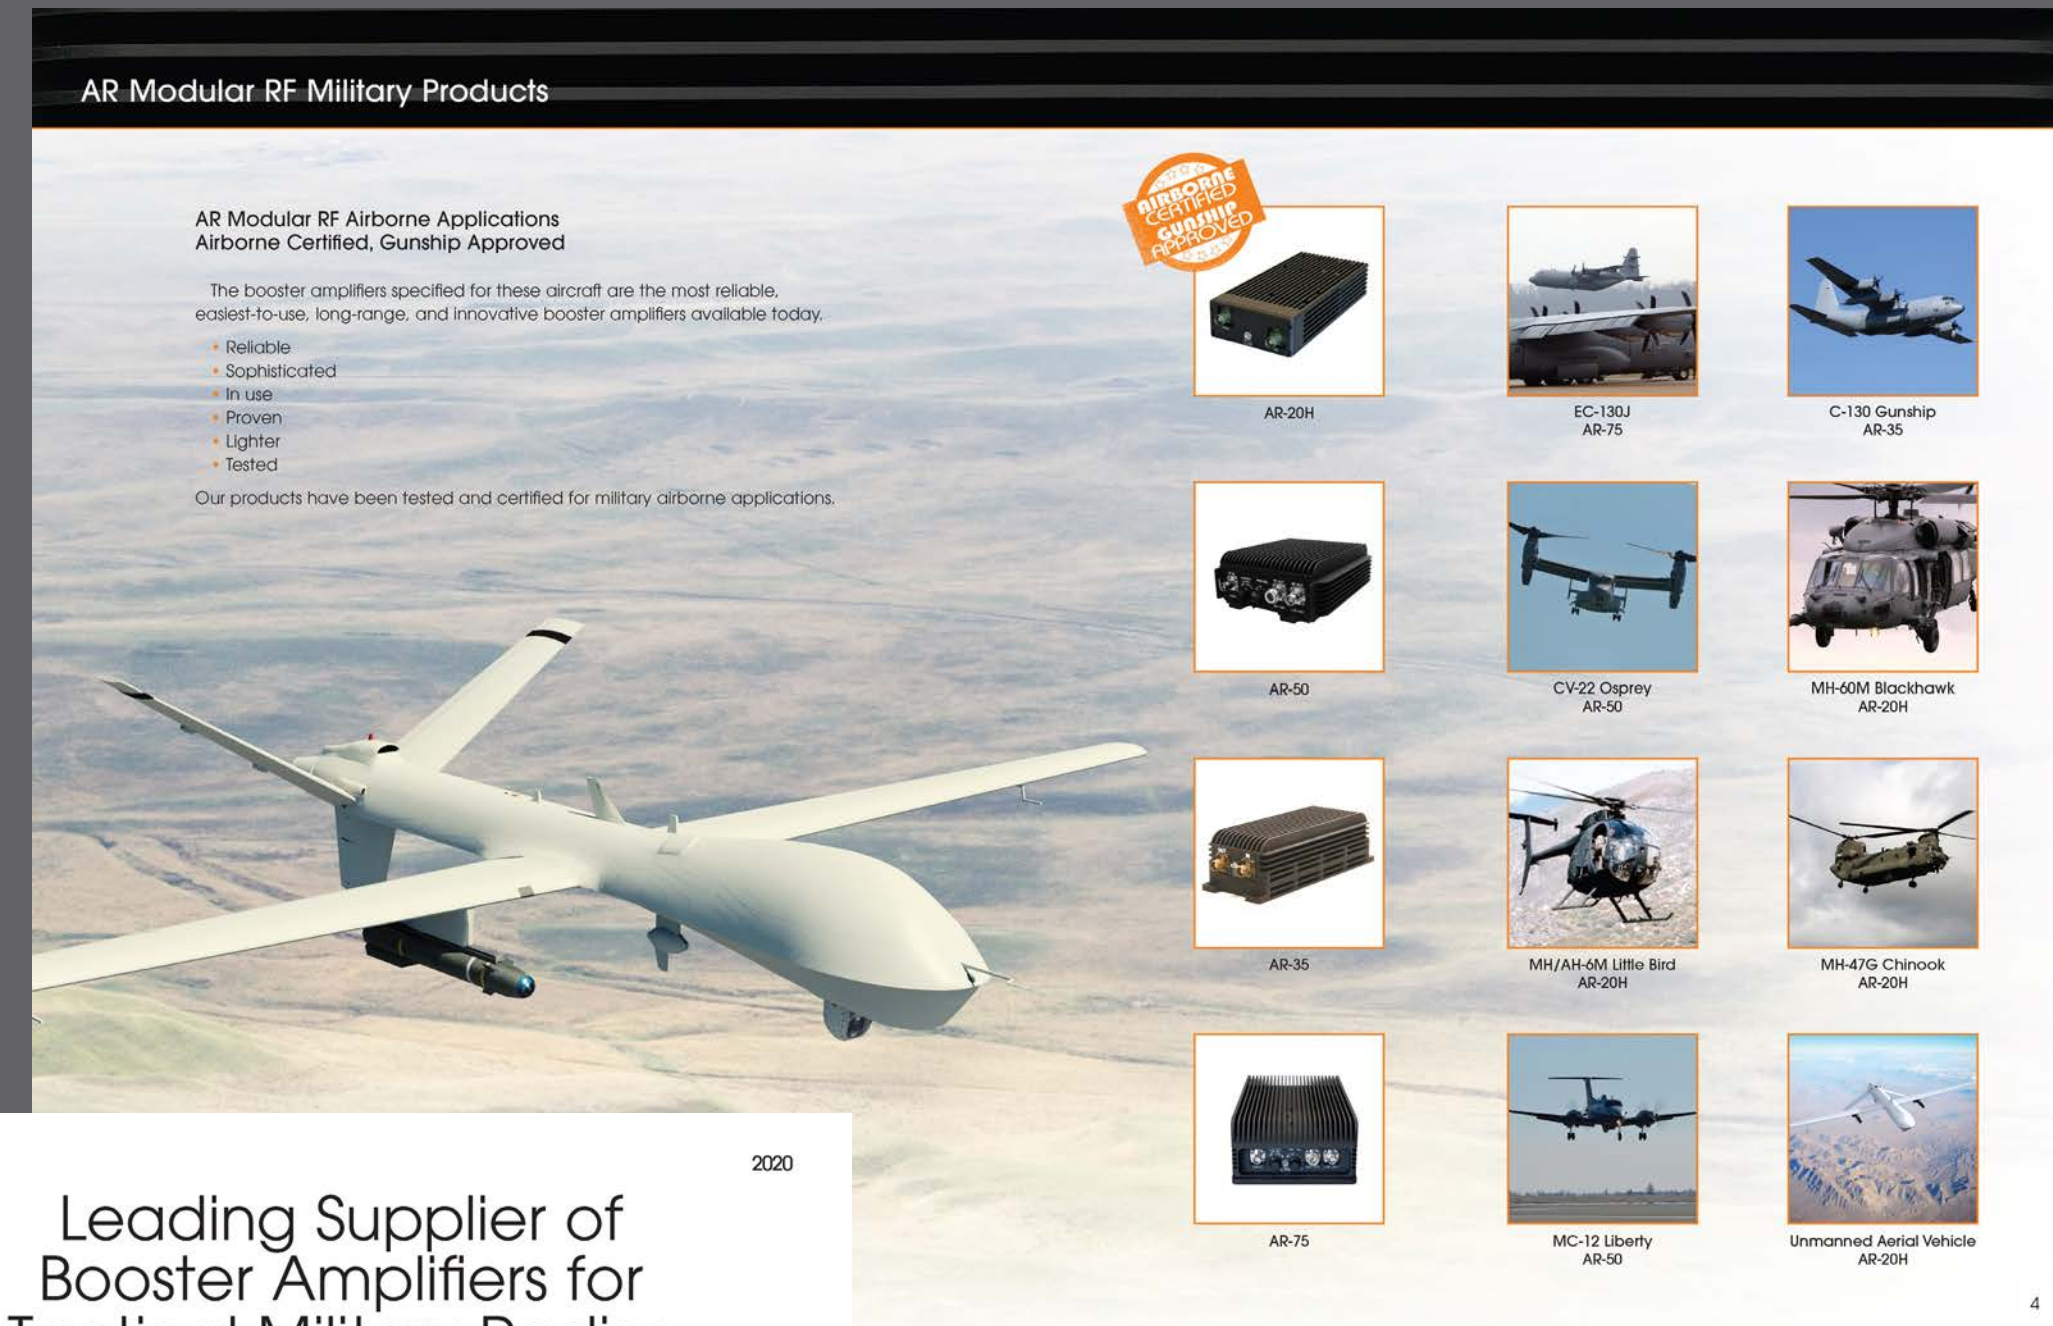

To learn more, visit www.ar-worldwide.com or call us at 215.723.8181. AR Worldwide. We're there.

We're with you all the way

With the right connections, anything is possible

The cables & RF components in your electronic system may not be the most important components to you, but they're everything to us. We design and manufacture cables & RF components with the understanding that if a connection fails, it can take your whole system with it. That's why our products are known for superior phase & amplitude stability, excellent measurement repeatability, and extra rugged mechanical strength. It's why we developed a unique way to wrap some of our cable in flexible "armor." And why every component shipped from MegaPhase is thoroughly tested and retested. We also provide a powerful warranty, the most responsive deliveries, and highly reliable customer service. Because doing one thing right just isn't enough. We do it right the first time, every time. Call 1-877-634-2742 or Solutions@MegaPhase.com. Visit our website at www.MegaPhase.com

MegaPhase Space Cable and Assemblies

Space Qualified, Ultra Lightweight, High Frequency

Since 1998, MegaPhase has designed and manufactured industry-leading radio frequency interconnect solutions that have allowed some of the biggest names in electronic technology to soar to new heights. Now, with more than 500 active customers in 30 countries, including the U.S. Government and its allies, MegaPhase has become the trusted source of high-performance radio frequency (RF) coaxial cables and connectors, operating from DC-110 GHz, for innovations in advanced microwave and optical electronic systems on the ground, sea, air, and space.

MegaPhase Advances Space Technology

MegaPhase is proud to have provided high-performance telemetry components to past and future space exploration missions, such as the historic long duration Hayabusa program; the first mission to land a spacecraft on an asteroid and return a sample to Earth. MegaPhase products will help propel future innovations such as Echostar's Jupiter-3, an advanced satellite to expand broadband capacity over North and South America, and World View Legion, the next generation of Earth-imaging systems, providing advanced mapping and analysis for emergency response, maritime surveillance, and infrastructure needs.
